Subject

SA4 – Pensions and Other Benefits Specialist Advanced

For 2022 Examinations
Aim

The aim of the Pensions and other Benefits Specialist Advanced subject is to instill in successful candidates the ability to apply knowledge of actuarial and related subjects as these apply to Pension, Social Security and other Employee Benefits in India (in particular and including actuarial and employee benefit work carried out in off-shored functions), UK and across the globe (in general).

Links to other subjects
Subject SP4: Pension and other Benefits Specialist Principles: provides the underlying principles upon which this subject is based. It is assumed that candidates have a good understanding of the principles covered in subject SP4.

Objectives

On completion of this subject the candidate actuary will be able to:

(a) Define the principal terms used in India (in particular), UK and across the globe (in general)

(b) Describe the roles of each of the following parties who may be involved in the provision of pensions in India (in particular), UK and across the globe (in general):
- the State
- the Pensions Regulator, PFRDA
- Taxation Authorities, CBDT
- employers and groups of employers
- individuals and groups of individuals
- trustees
- actuaries
- other Employee Benefits advisers
- Insurers

(c) Describe how the legal framework for pensions & other long term employee benefits applies in India (in particular), UK and across the globe (in general) such as Gratuity, Provident Fund, Public Provident Fund, Pensions (including National Pension System, Atal Pension Bima Yojana), Leave Benefits and Medical Benefits, attempt to:
- encourage appropriate non-State provision,
- ensure security for non-State provision,
- ensure adequacy of non-State provision,

And with particular reference to scheme entity, funding, solvency and others.

(d) Discuss the implications, for the parties in (b), of the Regulatory, Legislative and Taxation environment in which Pensions and other Employee benefits in India (in particular), UK and across the globe (in general) are provided in terms of the effect of:
(e) Describe the ways in which providers in India (in particular), UK and across the globe (in general) may be able to finance the benefits to be provided in terms of:

- the alternatives that exist relating to the timing of contributions relative to benefit Payments,
- the forms and characteristics of investment (including those provided by life insurers) that are available if contributions are made before benefits are due for payment.
- The alternatives to pension available to individuals – these include Regular income products available in Indian Markets including immediate & deferred annuities provided by Insurers, Small savings instruments provided by post office to Senior Citizens

(f) Discuss the factors to consider in determining a suitable design, in terms of benefits and contributions in India (in particular), UK and across the globe (in general), in relation to:

- types of pension and other employee benefit schemes (e.g. defined benefit, defined contribution, risk sharing)
- the level and form of benefits and/or contributions to be provided,
- the method of financing the benefits to be provided, the choice of assets when benefits are to be funded, how the risk is shared between parties.

(g) Discuss the issues surrounding sponsor covenant in India (in particular), UK and across the globe (in general) in terms of:

- what is meant by sponsor covenant
- how to measure the willingness of the sponsor to contribute
- how to measure the ability of the sponsor to contribute
- when the other parties involved should consider the sponsor covenant
(h) Describe the risks and uncertainties affecting: □ the level and incidence of benefits,
□ the level and incidence of contributions,
□ the level and incidence of return on assets,
□ the extent to which assets are exhausted during a member’s lifetime
□ the overall security of benefits in India.

(i) Analyze the investment strategy of a provider in India (in particular), UK and across the globe (in general) of pensions and related benefits in relation to:

□ any asset-liability matching requirements
□ the trade-off between risk and reward,
□ an awareness of adding value to the shareholders of the business, and
□ describe how projection models may be used to develop appropriate strategies.

(j) Describe the issues that arise from the transfer/amendment of pension and/or other employee benefit rights in the event of a significant corporate activity such as an acquisition or scheme merger, including matters relating to:
□ the interests and responsibilities of the parties involved,
□ the terms that might be set out in the Pensions Clause of a Sale and Purchase agreement,
□ financial aspects, such as the calculation of the bulk transfer value (if relevant) and benefits provided.

(k) Determine an appropriate method and appropriate financial and demographic assumptions for the valuation of defined benefit scheme open or closed to new entrants in India (in particular), UK and across the globe (in general) and placing values on benefits and contributions.

(l) Discuss the principles behind the determination of discontinuance terms in respect of benefits from an occupational pension scheme in India (in particular), UK and across the globe (in general), in relation to how the following may be taken into consideration when determining discontinuance terms:

□ rights of beneficiaries,
□ other benefit expectations,
□ the availability and selection of a method of provision of discontinuance benefits, □ the level of available assets.

(m) Discuss how to determine values for assets, past and future benefits and future contributions in India (in particular), UK and across the global (in general) environment, including:

□ the data requirements,
□ the need for placing values on assets, past and future benefits and contributions and the extent to which values should reflect investment/risk management strategy,
the reasons why the assumptions used may differ in different circumstances, the reasons why the assumptions and methods used to place a value on guarantees and options may differ from those used for calculating the reserves needed,
how sensitivity analysis can be used to check the appropriateness of the values and be able to perform calculations to demonstrate an understanding of the valuation methods.

(n) Discuss the principles underlying the use of insurance, and the choice of insurance contract, as a means of reducing some of the risks and uncertainties associated with the provision of pensions and other employee benefits.

(o) Discuss the benefit options typically available to individuals:

- Before retirement,
- At retirement
- After retirement

And discuss how to set appropriate terms and consent requirements for these options (where appropriate), taking into account the risk and reward for all relevant parties.

(p) Identify the sources of surplus/deficit for a benefit provider and discuss the factors that affect the application of this surplus/deficit.

(q) Describe how the financial significance of deviations from expectations should be monitored and assessed, in terms of:
- the reasons for monitoring,
- the data required,
- the process of analysis of the various factors affecting the experience,
- the use of the results of to help develop solutions to the problems faced in pension provision.

(r) Solve complex problems associated with:

- pension scheme design,
- setting funding rates,
- monitoring asset adequacy,
- investment policy, protecting members rights.

And, through integrating and critically evaluating the results, draw conclusions there from, in particular in relation to:

- the risks undertaken,
- the level of funding,
- ownership of surplus and handling deficiencies,
- future contributions,
- mergers and takeovers, winding up a scheme, sponsor covenants.
